Frontend Developer

Frontend Developer with 5+ years of experience building scalable, high-traffic e-commerce applications using JavaScript, TypeScript, React, and Next.js. Experienced in Agile environments, CI/CD pipelines, RESTful APIs, and microservice-based architectures. Strong focus on performance optimization, reusable component systems, and AI-assisted development workflows.

WORK EXPERIENCE

ikas 09/2021 - Present
Frontend Developer • Remote

- Worked on dashboard project. Dashboard project built with React.js, Antd, MobX, GraphQL and TypeScript.
- Builded themes and e-commerce stores with Next.js, Sass, Tailwind CSS, styled-components and other styling technologies. (ex: https://proteinocean.com)
- Developed and optimized scalable e-commerce storefronts serving millions of daily users.
- Built reusable UI components with React, Next.js, and TypeScript.
- Contributed to an internal UI component library used across multiple projects.
- Improved page performance and resolved UI/UX bottlenecks.
- Integrated RESTful APIs within microservice-based architecture.
- Worked in Agile/Scrum teams including sprint planning, estimation, and code reviews.
- Contributed to CI/CD pipelines ensuring reliable deployments.
- Leveraged AI-assisted development tools to enhance debugging and productivity.
